Working in Partnership With Our Clients

Waste Management Policy

It is our policy that our clients should not be burdened with any waste that our business creates in the course of its activities at your premises.

We have 'blue bag' re-cycling system that all our staff are trained in and adhere to.

This means that our waste (empty cleaning solutions bottles, mop heads, cloths and our own use product packaging) is removed from your site by our managers on a regular basis in the blue bag. A replacement bag is left for our staff to re-fill.

We go further by washing and re-using cloths where appropriate and re-cycling cleaning solutions bottles.

Where your business waste needs to be sorted for re-cycling we can help with this too. Details of how you require your waste to be sorted can be written in to our cleaning specifications and our staff trained in accordance with your procedures.

For further information on working in partnership with us, please call Sharon on 0161 456 8000
